

Applications:

K8 Cleaver is a high-precision Single-Fiber Cleaver with adapter plate, 16-position blade. Performs 48,000 single-fiber cleaves. The K8 Cleaver sets the standard for portability, reliability and ease of use. The K8 Cleavers are compatible with all Telecommunications fusion splicers. The improved version offers a larger base for a more stable platform, improved visibility when placing the fiber, the K8 is equally at home in a splicing van or in a bucket truck and is ideal for FTTx applications.

Features:

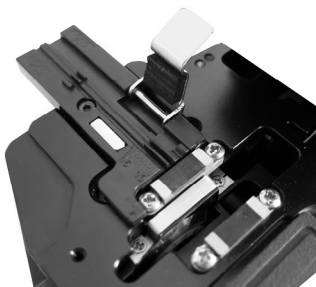

- One-step cleave operation
- Field assembly friendly with removable jig
- Coated outer diameter: 250µm & 900µm
- Match fiber: 3x2mm cable, Ø3mm, 125µm bare fiber and 900µm pigtail
- Cleave angle (Typ.): 0.5 degrees with single fibre
- Blade life: 48 000 cleaves (3 height x 16 positions)
- With off-cut collector
